April 27, 2018

As of this day, we have accomplished the following:

- **Planning and Disseminating of Task** – Started on April 22, 2017 (Sunday), our group, headed by Zhang, do the talks about the projects, plans and assigning of tasks to each member. This was happened on a group chat on Messenger.
As our group contains 6 members, we decided to divide the group by two in order to divide as well our tasks, the first three are Apilada, Pit-og and Zhang, who will take over the contents of the course website, and the second group of three members are Adriano, Gonzales and Nimes, who are assigned to work on the design of the website.
- **Created a Repository on GitHub** – On April 25, Pit-og created a repository on GitHub in order to maintain the collaboration of the group. See commit on the image below.

As we have accomplished the mockup and pre-contents of the course website, our next task will be the implementation of this mockup and insertion of the created pre-contents. Also, as it is our goal to provide features like quizzes/activities, interactive and multimedia contents, and responsive design, we still continue to work and search on to this progress.
